

OCF: Osteopathy

in the cranial field

orthodontics, braces & TMJ pain

braces: used to straighten teeth & to realign the jaw

OCF: used to treat TMJ pain and headaches

braces+OCF=better smile and less pain

The root cause of malocclusion, poorly fitting teeth, can be a strain pattern beginning in the skull or jaw. These strains can produce headaches, back pain, TMJ pain, or popping.

By combining braces and osteopathic manipulation, these strains can be addressed fixing the root of the problem in a shorter, and more comfortable amount of time.

osteopathic medicine is a system of healthcare emphasizing the health of the patient and his or her innate ability to heal.

a fully-licensed **osteopathic physician** is trained to use his or her hands to gently treat the patient and restore health. This treatment is **osteopathic manipulation**.

OCF Osteopathy in the Cranial Field

a specialized field of osteopathic manipulation. OCF is used to treat a variety of disorders to restore wholeness in health.

A.T. Still, M.D., D.O., the founder of osteopathy.

William Garner Sutherland, D.O., the founder of osteopathy in the cranial field.
